WEB PAGE

DESKTOP

PHONE

The desktop view displays a grid of four cards. From left to right: 1. A maroon background card featuring a circular logo for 'QUEENSLAND Masters SOFTBALL' with a softball player icon. 2. An orange background card with several floating, tilted yellow rectangular shapes. 3. A dark blue background card showing a vibrant purple and blue nebula or galaxy. 4. A light gray background card showing a portrait of a smiling man with dark hair and a blue button-down shirt. Below the grid is a dark footer bar containing the copyright notice: © Sanjeev Prasad 2022.

The phone view displays two cards side-by-side. The left card, titled 'The Designer', shows the maroon softball logo card from the desktop view. The right card, titled 'The Coder', shows the orange background card with floating yellow shapes from the desktop view.

# Blog Posts.

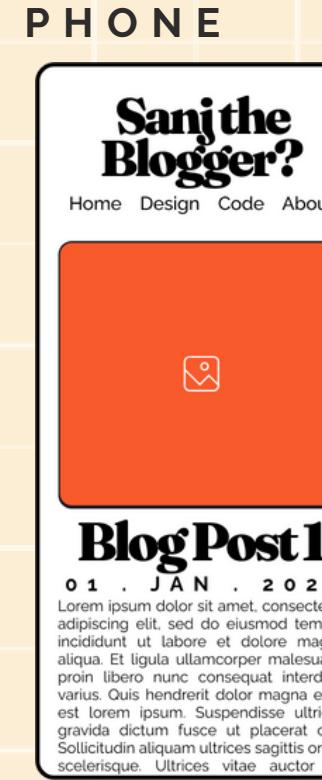

## WIREFRAME

- Each Post is a card
- Responsive and Flexible
- Image/Media display alongside text.

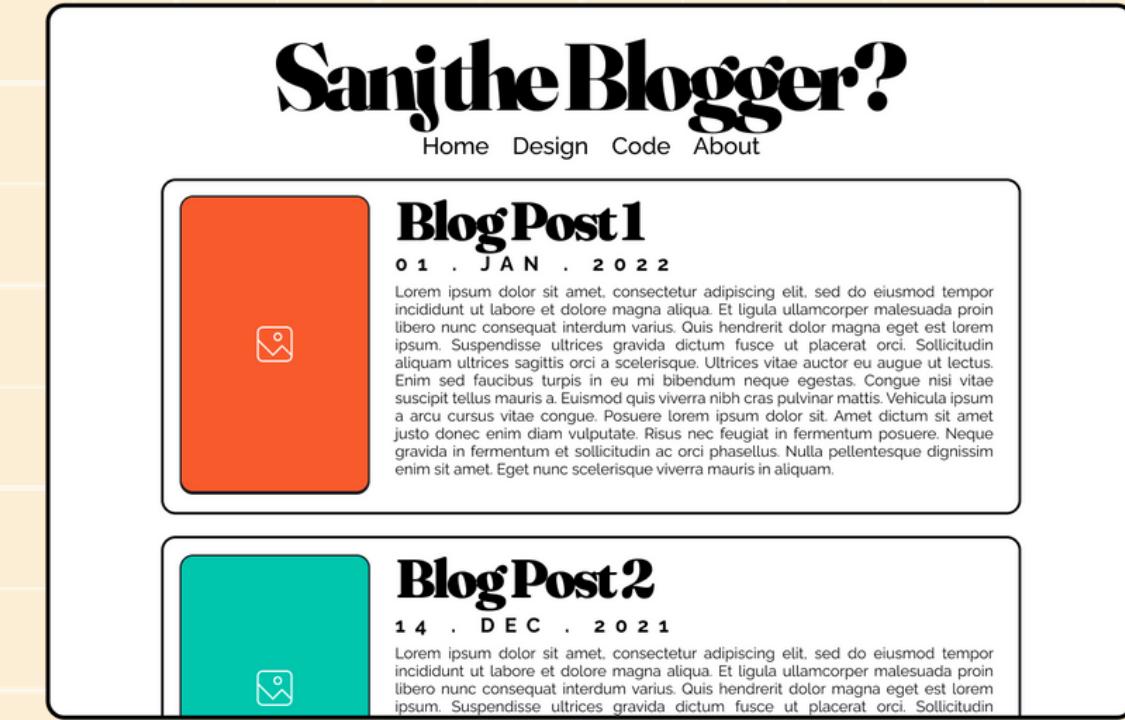

## COMPONENTS

- Card Posts
  - Image/Video to interest the viewers
  - Card design consistency
- Dynamic Page Title

Design Coding Blog About

### Drop that Domino!

PERSONAL PROJECT

Drop that Domino! is a simple game that I made for mobile devices. It started off as a small prototype, which I had liked enough, that I polished it up and released it for the 3 major mobile platforms. I see this game mostly as a learning experience for myself; something I did in my free time to see what its like to release a mobile game on a major platform.

### Neopolitan Panic!

LUDUM DARE 39

I worked on Neopolitan Panic! as a designer and programmer in a team of 4. The game was created in a span of 72 hours for the Ludum Dare 39 Game Jam. The theme for the game jam was 'Running out of Power'.

Players must drive an ice cream truck and deliver as much ice cream as possible before it all melts.

# Review.

## DEVELOPMENT

- Following the design process
  - Sitemap
  - Wireframes
  - Mobile first
- Knowing when to switch gears

## CHALLENGES

- Layout
  - Nested Flexboxes
- Responsiveness
- Mobile First development
- Designing for accessibility

## FAVOURITES

- Using Sass
- Animations
- When things work!

# Sanjeev.
